Gentlemen,

I am distributing the draft IN as a courtesy on the above mentioned topic, of which Byron, WNP2, and St. Lucie are highlighted. For each event discussed the cognizant resident inspector is listed as the technical contact. I believe most of you are familiar with the IN in some form or another. The attached IN is what has been signed off by the Division of Reactor Controls and Human Factors and is awaiting approval of my front office, Division of Reactor Program Management, prior to issuance--expected soon.

If you have any questions or concerns, please contact me (301) 415-2841, in order to discuss them with you prior to issuance.

Thank you

Stephen Koenick
