NRC Bulletin 89-01 required licensees to repair or remove steam generator mechanical tube plugs fabricated from thermally treated Inconel 600 material.

In Reference 1, we committed to remove all Alloy 600 hot leg plugs during the Spring 1992 refueling outage. However, due to problems with the removal process, the Alloy 600 plugs were repaired by installation of welded Inconel 690 plugs. This information was provided to the NRC in Reference 2.

Reference 3 committed to repair or replace the cold leg plugs during Refuel 8 (Fall 1996) or Refuel 9 (Spring 1998). All Westinghouse Alloy 600 plugs in the cold legs were replaced with mechanical Inconel 690 plugs during Refuel 8.

All actions required by Bulletin 89-01 have therefore been completed. If you have any questions concerning this information, please contact us.

Very truly yours,

Donald F. Schnell
