NOV 1 4 1985

Virginia Electric and Power Company
ATTN: Mr. W. L. Stewart, Vice President,
Nuclear Operations
P. O. Box 26666
Richmond, VA 23261

Gentlemen:

SUBJECT: REPORT NOS. 50-338/85-24 AND 50-339/85-24

On September 9-13, 1985, NRC inspected activities authorized by NRC Operating
License Nos. NPF-4 and NPF-7 for your North Anna facility. At the conclusion of
the inspection, the findings were discussed with those members of your staff
identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these
areas, the inspection consisted of selective examinations of procedures and
representative records, interviews with personnel, and observation of activities
in progress.

The inspection revealed no violations of NRC requirements. However, certain
activities having safety significance appeared to deviate from a commitment to
the NRC. The deviations and elements to be included in your response are pre-
sented in the enclosed Notice of Deviation.

Your attention is invited to unresolved items identified in the inspection
report. These matters will be pursued during future inspections.

The responses directed by this letter and the enclosures are not subject to the
clearance procedures of the Office of Management and Budget issued under the
Paperwork Reduction Act of 1980, PL 96-511.

Should you have any questions concerning this letter, please contact us.

Sincerely,

/s/

Virgil L. Brownlee, Chief
Reactor Projects Branch 2
Division of Reactor Projects
