Docket: 50-267/85-36

Public Service Company of Colorado  
ATTN: R. F. Walker, President  
P. O. Box 840  
Denver, Colorado 80201

Gentlemen:

This refers to the inspection conducted by Mr. R. E. Farrell of this office during the period December 1-31, 1985, of activities authorized by NRC Operating License DPR-34 for Fort St. Vrain Nuclear Generating Station, and to the discussion of our findings with Messers. J. Gahm and R. Craun at the conclusion of the inspection.

Areas examined during the inspection included operational safety verification, licensee action on previously identified inspection items, NUREG-0737 requirements (Three Mile Island Action Items), engineered safety feature systems, and new fuel inspection. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspector. These findings are documented in the enclosed report.

Within the scope of the inspection, no violations or deviations were identified.

We have examined actions you have taken with regard to a previously identified inspection finding. The status of this item is identified in paragraph 3 of the enclosed report.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Original Signed By

J. E. Gagliardo

J. E. Gagliardo, Chief  
Reactor Projects Branch
