U.S. NUCLEAR REGULATORY COMMISSION... ATOMIC SAFETY AND LICENSING BOARD

RE: PHILA. ELEC. CO. Limerick Gen. Sta. Units 1 & 2. Docket No. 50-352,353

Judges I.W. Smith, Chairman, Dr. R.F. Cole, G.A. Limerick, Jr. Feb. 26, 1986

SECRET NUMBER 50-352-04A
PROD. & UTIL. FAC.

PETITION BY INTERVENOR ANTHONY/FOE FOR A HEARING AND LEAVE TO INTERVENE IN OPPOSITION TO PECO'S REQUEST TO AMEND TS 4.6.1.2.d and g, LICENSE NPF-39

OFFICE OF SECRETARY
DOCKETING & SERVICE

On 2/15/86 we received notification of the establishment of an Atomic Safety and Licensing Board comprised of the judges above. Since this Board was designated to respond to the notice to amend PECO's operating license, NPF-39, 50 F.R. 52874, we conclude that its jurisdiction extends also to a further request from PECO for an amendment to revise Technical Specifications 4.6.1.2 d and g, 50 F.R. 53235.

We received a copy of 50 F.R. 53235 on 1/29/86 as an attachment to a Monthly Notice form from NRC, dated 1/27/86, addressed to Mr. Edward G. Bauer, Jr. Phila, Electric Co. We are hereby responding to this notice within the prescribed time period in opposition to the granting of this amendment and requesting a hearing before the Board and for leave to intervene as Robert L. Anthony/Friends of the Earth in the Delaware Valley, as in our previous intervention.

We assert that the extension of time for the leak rate testing on primary containment isolation valves from 3/3/86 to the proposed plant shutdown on 5/26/86 constitutes a high risk to the public and myself and my family and members of Friends of the Earth since the safe operation of the reactor cannot be assured without these tests ^{having} been successfully concluded.

We believe that we are entitled as affected residents and PECO ratepayers (1) to be admitted as a party to the proceedings, and that (2) as property owners and workers in the area of the Limerick plant we have family and financial interests in the proceedings, and (3) if this amendment were issued, there would be severe repercussions for us through the threat of radioactive poisoning from a possible radiological accident, the necessity to sell our property and seek employment outside the PECO area, and the accompanying financial and social disruption of our lives.

Furthermore, these tests could have been performed during plant shutdowns which included ^{the dates} 8-15 of October, 14-25 in Nov., 4 days in Dec. ¹⁹⁸⁵ and 3-9 and 14-20 in January 1986. They should, therefore, be required without extension of time.

We call the Board's attention to our submissions on Amendment "o.1 of 1/20, 2/5, 2/11, 2/12, and 2/15/86 and we incorporate these here by reference.

On the basis of the above we petition the Board for a hearing and leave to be admitted as an intervenor.

I certify copies by mail to: NRC-Sec., Gen Counsel
Docketing and Serv, Conner & Wetterhahn, F. Romano, LEA
Respectfully submitted,
Robert L. Anthony
Box 186 Moylan, Pa. 19065
