Subject: Limerick Generating Station, Units 1 and 2
1996 Annual Radiological Environmental Operating Report

Gentlemen:

In accordance with the requirements with the Limerick Generating Station (LGS) Unit 1 and 2 Technical Specifications (TS) Section 6.9.1.7, this letter submits the 1996 Annual Radiological Environmental Operating Report No. 13. This report provides the information delineated in TS Section 6.9.1.7, including a summary of the Radiological Environmental Monitoring Report (REMP).

The analyses of all samples collected to support the Radiological Environmental Monitoring Program indicate no detectable activity that can be attributed to LGS operations. By comparing these results with pre-operational data, we conclude that the operation of LGS had no adverse impact on the environment.

If you have any questions, please do not hesitate to contact us.

Very truly yours,

Walter G. MacFarland,
Vice President, Limerick Generating Station
