Director of Nuclear Reactor Regulation  
Attention: Mr. G. E. Lear  
Project Directorate No. 1  
Division of PWR-A Licensing  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Gentlemen:

Docket 50-305  
Operating License DPR-43  
Kewaunee Nuclear Power Plant  
Supplemental RER Response

- References: 1) Letter from S. A. Varga (NRC) to C. W. Giesler (WPSC)  
dated November 29, 1984  
2) Letter from D. C. Hintz (WPSC) to S. A. Varga (NRC)  
dated April 11, 1985

From June 11-15, 1984, the NRC conducted a Regulatory Effectiveness Review (RER) of the Kewaunee Nuclear Power Plant (KNPP). The primary purpose of the RER was to determine if the KNPP security program provides the level of protection intended by the NRC as delineated in 10 CFR Part 73. On November 29, 1984 (reference 1), the NRC transmitted the results of the review to WPSC. WPSC responded, as requested, to the findings by letter dated April 11, 1985 (reference 2). This letter is being submitted, as a result of conversations between our staffs on August 13, 1986, to provide additional information regarding the status of our efforts in addressing the concerns of the NRC in the protection of the KNPP vital equipment.

Sincerely,

*C.A. Schrock for*

D. C. Hintz  
Vice President - Nuclear Power
