Gentlemen:

Docket 50-305

Proposed Implementation of 10 CFR 73.55 Rule Changes

Reference: Miscellaneous Security Rule Changes of 10 CFR 73.55,
Federal Register Volume 51, Number 149, Dated August 4, 1986

The recently amended 10 CFR 73.55, referenced above, requires that each licensee submit proposed revisions to its security plan describing how the amended requirements of paragraphs (a), (d)(1), (d)(7), (d)(9) and (e)(1) will be met. The amended Part 73.55 further requires that each submittal include an implementation schedule for Commission approval.

Accordingly, we have attached as Enclosure I a descriptive summary of proposed changes to the Kewaunee Nuclear Power Plant Industrial Security Manual (ISM) consistent with the requirements of the referenced federal register. Enclosure II contains the amended pages of the ISM, with the proposed revisions highlighted with change bars.

WPSC proposes that the Industrial Security Manual changes be implemented within 180 days after Commission approval of the revisions.

The enclosures to this letter contain Security Safeguards information as defined by 10 CFR 73.21, and therefore shall not be placed in the public document rooms.

Sincerely,
