

'87 JUL 21 P2:38

July 13, 1987

Judge B. Paul Cotter, Jr.  
Atomic Safety and Licensing Board  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Honorable Judge Cotter:

I urge your support for the reracking of spent fuel assemblies in the storage pools at Diablo Canyon. Reracking will allow for safe, cost effective on-site storage of spent fuel. The proposed reracking is routine and consistent with similar activities by numerous other utilities.

Diablo Canyon is an outstanding value to PGandE customers and has an exceptional safety and performance record.

The additional fuel storage will allow PGandE to continue operation of this much needed and very reliable plant.

Sincerely,

*Jim Lauer*
