Docket No. 50-254

Mr. Thomas J. Kovach  
Nuclear Licensing Manager  
Commonwealth Edison Company  
Post Office Box 767  
Chicago, Illinois 60690

Dear Mr. Kovach:

SUBJECT: DENIAL OF AMENDMENT REQUEST FOR QUAD CITIES, UNIT 1 (TAC NO. 66622)

By letter dated November 16, 1987, Commonwealth Edison Company (CECo) submitted a Technical Specification (TS) amendment request to revise requirements associated with operability of recirculation jet pump flow instrumentation. In conference calls with the NRC staff, your staff committed to provide further technical information based upon additional studies conducted by General Electric to support this amendment request. Furthermore, we understand that CECo now plans to supersede the November 16, 1987 amendment request with a dual unit application.

Consequently, since your currently docketed application is not now supported by sufficient technical information and you anticipate superceding it with another application, CECo's request for license amendment is denied in its present form.

A copy of the Notice of Denial of Application for Amendment to be published in the Federal Register is enclosed for your information.

Sincerely,

151

Thierry M. Ross, Project Manager  
Project Directorate III-2  
Division of Reactor Projects - III
