SUBJECT: CLINTON POWER STATION – SUPPLEMENTAL INSPECTION
REPORT 05000461/2021440 AND ASSESSMENT FOLLOW-UP LETTER

Dear Mr. Rhoades:

On June 3, 2021, the U.S. Nuclear Regulatory Commission (NRC) completed a supplemental inspection and discussed the results of this inspection and the implementation of your corrective actions with Mr. T. Chalmers and other members of your staff. The results of this inspection are documented in the enclosed report.

We performed this inspection to review your station's actions in response to one or more Greater Than Green findings which were documented and finalized in NRC Inspection Reports 05000461/2020403 and 05000461/2020404 respectively.

On November 20, 2020, you informed the NRC that your station was ready for the supplemental inspection. We determined that the identified causes and corrective actions were sufficient to correct and preclude repetition of the performance issue that led to the one or more security related Greater Than Green findings. Therefore, the performance issue will not be considered as an Action Matrix input after the end of the Second Quarter of 2021. Based on the results of this inspection and our Action Matrix assessment, the NRC has determined that Clinton Power Station Unit 1 will be transitioned to the Licensee Response Column (Column 1) of the Action Matrix on July 1, 2021.

No findings, violations of more than minor significance, or general weaknesses were identified during this inspection.

This letter will be made available for public inspection and copying at <http://www.nrc.gov/reading-rm/adams.html> and at the NRC Public Document Room in accordance with Title 10 of the *Code of Federal Regulations* (10 CFR), Part 2.390, "Public Inspections, Exemptions, Requests for Withholding."

Enclosure(s) transmitted herewith contain(s) SUNSI. When separated from enclosure(s), this transmittal document is decontrolled.
