SALEM AND HOPE CREEK GENERATING STATIONS
BIOLOGICAL OPINION NER-2010-6581
2020 ANNUAL INCIDENTAL TAKE REPORT-STATION & REMP

In accordance with NER-2010-6581 and the Incidental Take Statement Terms and Conditions, PSEG hereby submits the attached 2020 Annual Incidental Take Report. PSEG has been unable to find any documentation to confirm submittal of the original annual report in March 2021. This report summarizes the interactions with T&E listed species at Salem and Hope Creek Generating Stations for the 2020 calendar year.

If you have any questions or concerns please do not hesitate to contact me. Thank you

Ken

SALEM AND HOPE CREEK GENERATING STATIONS
BIOLOGICAL OPINION NER-2010-6581
2020 ANNUAL INCIDENTAL TAKE REPORT-STATION & REMP

The U.S. Nuclear Regulatory Commission (USNRC) and the National Marine Fisheries Service (NMFS) concluded formal consultation under Section 7 of the Endangered Species Act of 1973, as amended, (ESA) on July 17, 2014, with NMFS's issuance of a final biological opinion and incidental take statement (ITS) for Salem Nuclear Generating Station, Units 1 and 2 (Salem), and Hope Creek Generating Station, Unit 1 (Hope Creek). USNRC Amendment Nos. 308 and 290 to Renewed Facility Operating Licenses DPR-70 and DPR-75 for the Salem Nuclear Generating Station, Unit Nos. 1 and 2, and USNRC Amendment No. 198 to Renewed Facility Operating License NPF-57 for the Hope Creek Generating Station incorporating provisions of the incidental take statement became effective at the Salem and Hope Creek Generating Stations (Station) on the date of issuance, June 17, 2015. Pursuant to Terms and Conditions (T&C) Nos. 9 and 23 of the ITS, this report is being provided to detail interactions with Endangered Species Act (ESA) listed species at the Salem and Hope Creek Generating Stations for the 2020 reporting year.

In accordance with T&C #9 of the ITS, Table 1 summarizes the sturgeon interactions at the Station for the previous reporting year. Tables 2 and 3 provide information regarding the collection under each category specified in the ITS. There was one severely decomposed Kemp's Ridley sea turtle collected at the intake structure during 2020. No sturgeon were collected during impingement sampling of the traveling screen wash water. There were no additional sightings of sturgeon or sea turtles in the vicinity of the Station that require reporting under the ITS.

During the 2020 reporting year, there were no interactions with a listed Endangered Species Act (ESA) species during Radiological Effluent Monitoring Program (REMP) sampling. Table 4 is submitted in satisfaction of T&C #23 of the ITS.

Table 5 of this report contains records of trash rack inspection dates and times for the seven days (168 hours) prior to each take listed in Table 1. As demonstrated by these records, PSEG routinely inspects the trash bars at least once per shift. No observations of threatened and endangered species were noted during these inspections. None of the sturgeon listed in Table 1 were recovered from the water surface where they would have been observed during routine inspections.

PSEG submitted incident reports and sturgeon data reporting forms for each collection as specified in the ITS. The previously submitted reports contain additional detail and photographs for all collected specimens.

PSEG confirms that we have renewed our arrangement with the Marine Mammal Stranding Center (MMSC) in Brigantine, New Jersey for 2021. PSEG will continue to rely upon the MMSC to provide any necessary assistance with the transport, evaluation, veterinary care, tagging and release of any future sea turtles recovered at the Station.

If you have any questions or require additional information, please do not hesitate to contact Ken Strait at (856) 339-3929.

Sincerely,

David Sharbaugh
Vice President - Salem
