James A. FitzPatrick Nuclear Power Plant
Renewed Facility Operating License No. DPR-059
NRC Docket No. 50-333

Subject: Notification of Readiness for NRC 95001 Inspection

- References:
1. NRC letter, Final Significance Determination of a White Finding with Assessment Follow-Up and Notice of Violation, ML21105A543, dated April 20, 2021
 2. NRC letter, Response to Contested Violation and Final White Finding and Revised Notice of Violation, ML21244A497, dated September 3, 2021

Dear Sir or Madam:

On April 20, 2021, the NRC gave Notice to James A. FitzPatrick Nuclear Power Plant (JAF) of an escalated enforcement action, EA-20-138, associated with a White Finding, 05000333/2020012-01, Defective Part Results in High Pressure Coolant System Pressure Control Valve Failure. On September 3, 2021, the NRC provided a final White Finding and revised notice of violation.

The NRC plans to conduct a supplemental inspection in accordance with Inspection Procedure 95001, "Supplemental Inspection for One or Two White Inputs in a Strategic Performance Area" following notification of readiness for a supplemental inspection. This letter notifies the NRC that FitzPatrick is ready for the supplemental inspection.

There are no new regulatory commitments contained in this letter. If you should have any questions, please contact Mr. Richard M. Sullivan, Regulatory Assurance Manager, at 315-349-6262.

Very truly yours,

Timothy C. Peter
