SG-2.1	Notwithstanding the requirements of 10 CFR 74.59(f)(2)(viii) to remeasure, at the time of physical inventory, any in-process SSNM for which the validity of a prior measurement has not been assured by tamper-safing, the licensee may book for high enriched uranium (HEU) physical inventory purposes:	
	<ul style="list-style-type: none"> (a) process holdup quantities determined by nondestructive assay measurements in manufacturing facilities performed prior to the start of an inventory, in accordance with the controls described in Section 4.5.2.3.2 of the Plan identified in Condition SG-1.1; and (b) pre-listed material introduced to process in the manufacturing facilities prior to the start of an inventory, in accordance with the controls described in Section 4.5.2.3.2 of the Plan identified in Condition SG-1.1.
