**NOTIFICATION**

The U.S. Nuclear Regulatory Commission Staff is filing this notification to inform the Commission and the participants in this matter that on May 9, 2022, the Staff issued a letter to Entergy Nuclear Operations, Inc. (ENOI) confirming that the Staff's December 13, 2021, order approving ENOI's license transfer application (LTA) regarding Palisades Nuclear Plant, Big Rock Point Plant, and their associated independent spent fuel storage installations remains valid and in effect as of the date issued. The Staff issued this letter in response to a January 21, 2022, update of the LTA by Holtec Decommissioning International, LLC (HDI).

On December 23, 2020, ENOI filed the LTA on behalf of itself, HDI, and others seeking approval, in part, to transfer ENOI's operating authority under the above-referenced licenses to HDI. In the LTA, ENOI stated that after the proposed transfer, Comprehensive Decommissioning International, LLC (CDI), a subsidiary of HDI, would become the decommissioning general manager for the sites. After the Staff approved the LTA but before the completion of the transfer, HDI, by letter dated January 21, 2022, updated the LTA to provide that HDI, not CDI, would become the decommissioning general manager for the sites. In its May 9, 2022, response to HDI's January 21, 2022, update of the LTA, the Staff explains that the updated information does not have an impact on the Staff's December 13, 2021, order approving the LTA and that, therefore, that order remains unchanged and effective as issued (i.e., effective for one year from the date of the order, with such date able to be extended by order upon written application and for good cause shown).

The May 9, 2022, Staff letter may be obtained online in the NRC's Agencywide Documents Access and Management System Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html> under Accession No. ML22096A304.

Respectfully submitted,
