Washington, DC 20555-0001

REFERENCE: Docket 50-186
University of Missouri-Columbia Research Reactor
Renewed Facility Operating License No. R-103

SUBJECT: Submittal of revised annual operating report for the University of Missouri-Columbia
Research Reactor as required by MURR Technical Specification 6.6.e

Enclosed is a copy of the revised 2021 Reactor Operations Annual Report for the University of Missouri-Columbia Research Reactor (MURR®). This document is being submitted to the U.S. Nuclear Regulatory Commission (NRC) in accordance with the MURR Technical Specification 6.6.e.

On February 25, 2022, MURR submitted its initial annual operating report that, due to the COVID-19 pandemic and supply chain issues, did not include complete environmental thermoluminescent dosimeter and personnel radiation exposure data for December 2021 in Sections VIII and IX. This information has since been received from Mirion Technologies and is being submitted to the NRC in this follow-up report.

If you have any questions regarding the contents of this report, please contact Ron Astrino at AstrinoR@missouri.edu or by calling (573) 882-5118.

Sincerely,

Ronald M. Astrino
Reactor Manager

ENDORSEMENT:
Reviewed and Approved,

J. David Robertson
Reactor Facility Director
