**To:** Sarah Abramson  
**Subject:** 10 CFR 2.206 Petition from C-10 - Seabrook Station Concrete Degradation

Good Morning,

This e-mail is to inform you that I will be the Petition Manager for your October 4, 2022, petition. I will keep you informed of the status as the evaluation of your petition progresses. Please feel free to contact me with any questions about the process and/or the status of the petition review at any time.

In your petition you requested that the Nuclear Regulatory Commission (NRC) issue an Order to NextEra seeking to hasten its compliance with the regulatory requirements in the NRC's March 11, 2019, license amendment and the March 12, 2019, renewal of the operating license for Seabrook. The NRC staff has concluded that your petition has screened into the 2.206 process in accordance with Section II.A.2(d) of NRC Management Directive (MD) 8.11 "Review Process for 10 CFR 2.206 Petitions" (Agencywide Documents Access and Management System (ADAMS) Accession No. ML18296A043) and a Petition Review Board will begin its evaluation.

Following review in accordance with Sections II.B.1 of MD 8.11, the NRC staff has concluded that there is no imminent safety concern related to the Seabrook Station concrete degradation that warrants immediate action.

As the PRB begins its evaluation I would like to ensure that you are aware that because the 2.206 petition process is a public process, the petition and all the information in it, including your identity, will be made public.

Thanks,

**James Kim**

Project Manager / 2.206 Petition Core Team Member
