Hi Briana,

Yes, that is correct.

Thank you,
Audra

Audra,

Thanks for the reply! So, just to confirm in writing—As with the 2019 capture, NMFS's view is that the NRC does not need to reinitiate consultation for the Jan 3 olive ridley capture because such captures are extremely rare and captured individuals are considered lost to the population.

Thanks,

Briana

Hi Briana,

Thanks for following up. I checked with our Sea Turtles Branch Chief concerning the recent olive ridley capture. We believe these instances are extremely rare, and that these individuals (the recent capture and the previous olive ridley capture in 2019) are essentially “lost” to the population.

Kind regards,

Audra

Good morning Audra,

Just wanted to follow up on the email chain below regarding the olive ridley capture at St. Lucie. Have you heard anything further on the appropriate next steps? Thanks!

Briana

Hi Kristin,

Thank you for letting me know. I've informed my supervisor and our Sea Turtle Branch Chief regarding this second olive ridley capture at the plant. I will keep you posted if I hear anything.

Kind regards,

Audra

Hi Audra,

Following up with a voicemail I just left, the St. Lucie Plant captured an olive ridley on 1/3/23. The turtle was in good condition and was released, with a satellite tag. Attached are the capture sheets and photos with additional information. Please let me know if you have any questions.

Thanks,

Kristin (Peekstok) Eaton
