**Subject:** Document request for upcoming Radiation Protection (RP) inspection at Hatch

Date: Friday, May 26, 2023 9:36:00 AM
Attachments: HAT 2023-03 RP Doc Request.pdf

Please see the attached document request for our upcoming RP inspection scheduled for July 10 - 14, 2023. Note that some of the items may be outside RP's purview, so coordination with other groups might be required (e.g. release permits, groundwater monitoring data, etc).

We would like to have the documents available by June 30, 2023. However, if you run into difficulty and need more time for certain items, just let us know and we can work with you.

Please call me if you have any questions.

Thanks, Adam Nielsen Senior Health Physicist US NRC Region II (404) 997-4660

# Hatch Nuclear Plant Radiation Safety Baseline Inspection Initial Information Request Inspection Report: 2023003

During the week of July 10 - 14, 2023, the NRC will perform a baseline Radiation Safety Inspection at the Hatch Nuclear Plant (NRC Inspection Procedures 71124.06, 71124.07, and 71151).

Experience has shown that this inspection is resource-intensive for both the NRC inspectors and your staff. In order to minimize the impact to your onsite resources and to ensure a productive inspection, we are requesting in advance documents needed for this activity. It is important that all of these documents are up-to-date, and complete, thereby minimizing the number of additional documents requested during the preparation, and/or the onsite portions of the inspection. The NRC requests that these documents be provided to the inspectors no later than June 30, 2023.

If there are any questions about this inspection or the material requested, please contact the lead inspector, Adam Nielsen at 404-997-4660, or the Engineering Branch 3 Chief, Binoy Desai at 404-997-4519.

In accordance with Title 10 of the *Code of Federal Regulations* (10 CFR) 2.390, "Public inspections, exemptions, requests for withholding," a copy of this document will be available electronically for public inspection in the NRC Public Document Room, or from the Publicly Available Records component of NRC's Agencywide Documents Access and Management System (ADAMS); accessible from the NRC Web site at <a href="http://www.nrc.gov/reading-rm/adams.html">http://www.nrc.gov/reading-rm/adams.html</a>.

### PAPERWORK REDUCTION ACT STATEMENT

This document does not contain new or amended information collection requirements subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.). Existing information collection requirements were approved by the Office of Management and Budget under control numbers 3150-0008, 3150-0011, 3150-0014, 3150-0044, and 3150-0135.

### PUBLIC PROTECTION NOTIFICATION

The NRC may not conduct or sponsor, and a person is not required to respond to, a request for information or an information collection requirement, unless the requesting document displays a currently valid Office of Management and Budget control number.

### **Document Request List**

Inspection Dates: July 10 – July 14, 2023

Documents Due to Region II: June 30, 2023

Inspection Procedures: IP 71124.06 Radioactive Gaseous and Liquid Effluent

Treatment

IP 71124.07 Radiological Environmental Monitoring

Program (REMP)

IP 71151 Performance Indicator Verification (Public

Cornerstone)

Lead Inspector: Adam Nielsen

Sr. Health Physicist US NRC Region II (404) 997-4660

Adam.Nielsen@nrc.gov

**Note:** The current version of these documents is expected unless specified otherwise. Electronic media is preferred if readily available. Note that the inspectors cannot accept data provided on USB or "flash" drives due to NRC IT security policies. Please organize the information as it is arranged below to the extent possible. Pay particular attention to the date ranges for the items requested as they may change from item to item. If there are questions regarding the documents requested, or if the documents cannot be provided by the due date, please do not hesitate to contact the lead inspector.

### Miscellaneous

- 1. List of primary contacts for each inspection area w/phone numbers
- 2. Corrective action program procedure(s)
- 3. Offsite Dose Calculation Manual (ODCM)
- 4. Procedures for gathering and reporting NRC Performance Indicator data
- 5. 2022 Radioactive Effluent Release Report
- 6. 2022 Radiological Environmental Monitoring Report
- 7. Most recent 10 CFR 61 analysis for the Dry Active Waste (DAW) waste stream, showing radionuclide percent abundance.

## 71124.06 - Radioactive Gaseous and Liquid Effluent Treatment

- 1. Procedures for collection and analysis of effluent samples, release of effluents, and release permit creation for gaseous and liquid effluents
- 2. List of permitted gaseous and liquid effluent release points, including release points from onsite surface water bodies (as applicable)
- 3. List of "out of service" (OOS) time periods for any effluent monitors that required compensatory sampling since December 5, 2020.
- 4. The last two gaseous effluent release permits and the last two liquid effluent release permits
- 5. Most recent audit, self-assessment, and/or review of the radioactive effluent monitoring program
- 6. List of CRs generated since <u>December 5, 2020</u>, as a result of gaseous and liquid effluent processing and/or ODCM related activities.

# 71124.07 - Radiological Environmental Monitoring Program (REMP)

- 1. Collection schedule for REMP sampling during the week of inspection and contact numbers for collection staff.
- 2. Procedures for collection and analysis of environmental samples, calibration and maintenance of REMP air and water samplers, and calibration of meteorological monitoring instruments
- 3. All procedures related to the Groundwater Protection Program.
- 4. The last two calibration records for each REMP air and water sampler (as applicable)
- 5. The last two calibration records for each meteorological monitoring instrument on the primary tower (wind speed, wind direction, and air temperature)
- 6. Annual data recovery summaries for meteorological monitoring instruments and/or Annual Meteorological Monitoring Reports, since <u>December 5, 2020</u>,
- 7. Most recent inter-laboratory comparison results for the lab used to analyze REMP samples
- 8. List of systems, structures, and components (SSCs), identified as credible mechanisms for the potential release of licensed material to the groundwater. Including risk-ranking.
- 9. List of any non-radioactive systems that have become contaminated since <u>December 5</u>, <u>2020</u>.
- 10. Copies of any reports to the NRC (via ODCM, 10 CFR 50.72, or any other reporting requirements) due to effluent/REMP/groundwater issues since <u>December 5, 2020</u>.
- 11. List of 10 CFR 50.75(g) entries made since December 5, 2020.
- 12. Recent results of the groundwater monitoring program (at least the last two quarters of data)
- 13. Most recent audit, self-assessment, and/or review of REMP activities
- 14. Most recent audit, self-assessment, and/or review of the Groundwater Protection Program
- 15. List of CRs generated as a result of REMP and groundwater protection activities since December 5, 2020. Include all CRs related to voluntary reporting of onsite spills/leaks of radioactive material.
