Readiness to License Power Uprates

C1 D

Types of Power Uprates

Actively Monitoring the Landscape

• Inflation Reduction Act of 2022, tax credits supporting continued operations with power uprates and ATF.

 >50% of sites are planning for one or more power uprates with a combined capacity equivalent to 2 large LWRs.

Photo Credit: Nuclear Energy Institute (NEI) The Future of Nuclear Power 2023 Baseline Survey Note: Unspecified Power Uprates in the 1% to 3% range are identified as "Other" on this graphic.

Using Power Uprate Historical Data to Optimize our Future Processes

Brian Smith

Division Director, Division of New and Renewed Licenses, Office of Nuclear Reactor Regulation

License Renewal Program Update and Future Enhancement

License Renewal and Subsequent License Renewal Program Accomplishments/Updates

U.S. Operating Commercial Nuclear Power Reactors

- Issued initial license renewals for 94 reactors and subsequent license renewals for 6 reactors.
- Issued the draft revised Generic Environmental Impact Statement and proposed rule.
- Updating subsequent license renewal guidance documents (GALL-SLR and SRP).
- Revised license renewal inspection procedures.
- Future submittals include an additional 4 applications within the next 6 months.

Domestic and International Outreach

- Domestic activities
 - Support from Office of Research
 - Coordination with EPRI and DOE
- International activities
 - Bilateral support
 - Multilateral workshop
 - IAEA's IGALL steering committee and support
 - Convention on Nuclear Safety identified as good practice
 - International LTO conferences and seminars

License Renewal Enhancements

- Engaging with stakeholders to identify review efficiencies
 - Enhancing applications and process improvements
 - Evaluating use of risk information in aging management programs and reviews
- On-going process improvements for SLR Reviews
 - Reduction in staff hours while ensuring safety

Phil McKenna

Deputy Division Director, Division of Reactor Oversight, Office of Nuclear Reactor Regulation

Implementation of Reactor Oversight Process Enhancements

BASELINE INSPECTION PROGRAM

Minimum inspection for every operating reactor licensee

Provides reasonable assurance of adequate protection BASELINE INSPECTIONS ARE RISK INFORMED

Selection of inspectable areas

Inspection frequency and sample size

Sample selection of activities and equipment

ROP IS CONSTANTLY EVOLVING

Operating experience

Internal and External Feedback

2019 ROP enhancement initiative

ROP is Inherently Risk Informed

ROP Enhancement has Improved Reactor Oversight

- How we got here
 - ROP enhancement has assisted shaping the risk informed ROP inspection program

• ROP enhancements implemented in FY23

- Quadrennial engineering inspection cycle
- Revised treatment of greater-than-green inspection findings and performance indicators
- Revision to the problem and identification and resolution Inspection Procedure
- Status of remaining actions
 - Emergency Response Facility and Equipment Readiness Performance Indicator
 - Emergency Planning SDP

Optimization of the Risk-Informed ROP Inspection Program

LaDonna Suggs

Acting Division Director, Division of Reactor Projects, Region II

Resident Inspector Health – Recruitment and Retention

Resident Inspectors are Integral to Safety

- Dedication to public safety
- 350+ plant events annually
 - ✓ Scrams
 - ✓ Emergency Declarations
 - ✓ Plant Startups
 - ✓ Weather Events
- Commitment to Excellence

McGuire Senior Resident Inspector, Chris Safouri, and Resident Inspector, Frank Young, inspecting an emergency diesel generator

CAUTICA CAU

Maintaining a Strong Resident Workforce

- * In the past two years:
 - Hired 38 New Staff in the Resident Inspector Development Program (RIDP)
 - ✓ 40% of Regional Hiring
 - 23 RIDPs in permanent resident positions
- * 21 currently in the RIDP pool

Innovations in Training to Maximize Efficiency

Competency-Based Qualifications

- ✓ On the job training
- Individualized interactions with expert mentors
- ✓ Far less completion time

Enhanced Inspector Training

- ✓ Leverages former senior residents
- Also expedites qualification process while maintaining quality

Strategic Solutions to Complex Challenges

Compensation and Hiring Flexibilities

- Forward-looking site coverage forecasting metrics
- Rehired annuitants
- Relocation

Retention and Career Development

 Annual and multitour financial incentives

Morale and Welfare

- Engagement with the Resident Inspector Standing Committee
- Streamlining agency systems and processes

Daniel Dorman

Executive Director for Operations

Effective and Timely Review and Innovative Oversight Approaches for New and Advanced Reactors

One potential advantage of a #microreactor is it could be made in a factory and transported where needed. But there are also challenges. Our white paper examines these challenges and will be the focus of a meeting on Sect 11. nc. sov/bmns/mtg?do=de...

Collaboration with the Canadian Nuclear Safety Commission to Address Challenging Topics in Licensing Advanced Reactors

Lauren Nist

Acting Director, Vogtle Project Office, Office of Nuclear Reactor Regulation

Leveraging Successes and Lessons Learned from Vogtle 3 and 4 for Future Construction Projects

NRC Accomplishments at Vogtle 3 and 4

The NRC staff completed inspections of startup tests on Vogtle Unit 3, which commenced commercial operation on July 31, 2023.

NRR issued emergent and exigent license amendments for Vogtle Unit 3 allowing for the licensee to safely conduct repairs and avoid delays in startup testing.

NRR issued the 10 CFR 52.103(g) finding for Vogtle Unit 4 on July 28, 2023.
