Sequoyah Nuclear Plant, Units 1 and 2
Renewed Facility Operating License Nos. DPR-77 and DPR-79
NRC Docket Nos. 50-327 and 50-328

Subject: Final Report of a Deviation or Failure to Comply – Crompton Instruments Type 077 Ammeter

Reference: TVA letter to NRC, "Final Report of a Deviation or Failure to Comply – Crompton Instruments Type 077 Ammeter," dated January 3, 2024

In accordance with the requirements of 10 CFR 21.21(a)(2), the Tennessee Valley Authority is submitting this final update to the Referenced report for Sequoyah Nuclear Plant (SQN).

The Interim Report informed NRC that an evaluation was ongoing as a result of a test failure of an ammeter, Crompton Instruments Type 077, 0-150A, 077-05FA-LSPZ-C6. The TVA evaluation has concluded that the application of this component would not have resulted in a substantial safety hazard or violate a license technical specifications safety limit. Accordingly, this investigation is now considered closed.

There are no new regulatory commitments contained in this letter. Should you have any questions concerning this submittal, please contact Mr. Rick Medina, Site Licensing Manager, at (423) 843-8129 or rmedina4@tva.gov.

Respectfully,

B. Jenkins for T. Marshall
