COMMENTS: Below XX Attached ___ None ___

I approve the staff's recommendation that the policy statement on Medical Uses of Byproduct Material not be updated at this time. In developing this recommendation, the staff consulted with the Advisory Committee on the Medical Uses of Isotopes (ACMUI). In studying the existing policy statement, ACMUI concluded that the current policy statement provides for the safe medical use of radionuclides for patients, medical research subjects, workers, and the general public while guarding against intrusion into the practice of medicine. ACMUI, therefore, determined that no revision is warranted at this time. I agree. The broad principles of policy as laid out in the existing policy statement continue to be effective and sufficiently adaptable to current issues.

COMMENTS: Below X Attached ___ None ___

I approve the staff's recommendation that the NRC should not update the Medical Policy Statement. I agree that the current Medical Policy Statement continues to guide the NRC in the promulgation of regulations that are protective of public health and safety.

I do not see any compelling reason to update the Medical Policy Statement at this time. Rather, in keeping with our Principles of Good Regulation, once established, our policies should be reliable and stable—change should occur only when technically justified.

I appreciate that the staff consulted with the Advisory Committee on the Medical Uses of Isotopes (ACMUI) in developing its recommendation to the Commission. The ACMUI reviewed the existing Medical Policy Statement and concluded that it provides for the safe medical use of radionuclides for patients, medical research subjects, workers, and the general public while not intruding into the practice of medicine. I approve the staff's recommendation that the policy statement on Medical Uses of Byproduct Material not be updated at this time.
