NRC to Conduct Public Webinar on July 16 to Discuss Three Mile Island 1 Nuclear Power Plant Decommissioning Topics

The Nuclear Regulatory Commission staff will present a webinar for interested members of the public on July 16 regarding the decommissioning of the Three Mile Island 1 nuclear power plant, located in Londonderry, Pa.

The purpose of the webinar is to provide key facts about the decommissioning process and how the NRC regulates such activities through on-site inspections and other reviews.

The webinar will begin at 1 p.m. Participants will be able to view slides prepared by NRC staff and ask questions in writing via a web page set up to host the session. [Online registration](#) is required to take part.

The NRC will also hold a public meeting in Hershey, Pa., on July 23 to discuss and accept public comments on Exelon's Post-Shutdown Decommissioning Activities Report for Three Mile Island 1, which calls for placing the plant into long-term storage before dismantlement and decontamination work takes place. A copy of the [report](#) can be found on the NRC website.

Three Mile Island 1 is scheduled to permanently cease operations by Sept. 30, 2019.

The adjacent Three Mile Island 2 plant did not return to service following the March 1979 accident. It has a different owner and a PSDAR for that unit was submitted to the NRC in June 2013.
